Connect. Communicate. Collaborate.

Quick Cloud Hosted is a license-based monthly service in which a data center is used to host the PBX features, and user licenses are purchased based on features needed. Using this technology and methodology, our Quick Cloud Hosted can allow your business to meet its technological needs while minimizing, or even eliminating your initial out of pocket expense.

Why Quick Cloud?

With Quick Cloud Hosted, you can assign each employee and phone location a service package and handset best suited to his or her specific need. Unlike other PBX solutions, you can add as many users as required as your business evolves and grows. What's more, add cloud-based enterprise-grade features such as Contact Center or call recording, or the productivity enhancements of UC, and unleash the power of cloud communications with you in complete
